► EDUCATION

**Computer Programming
Associate Degree (GPA: 3.73)**

Izmir University of Economics

September 2025

January 2027

► LANGUAGES

English (B2)
Almanca (A1)

► PROJECTS

- Video Site Databases ([GitHub](#))
- SatrançHocam Website ([GitHub](#))
- Library Automation System ([GitHub](#))
- Memory Card Game ([GitHub](#))
- Video Website ([GitHub](#))
- IT Department Maintenance Website ([GitHub](#))

► HOBBIES

- Competitive and Indie Video Games
- Chess

ABOUT

I am a student at Izmir University of Economics and I am expected to graduate at the beginning of 2027. I am interested in software development, web design, database management, and creating user-friendly interfaces. During my education, I have been developing various projects using HTML, CSS, JavaScript, C#, SQL, and PHP.

TECHNICAL SKILLS

Programming Languages

HTML, CSS, JavaScript

- I have developed many projects that establish frontend-backend connections using JavaScript async and fetch methods, and I designed them with CSS to create user-friendly interfaces.

C#, Python, Java, PHP, SQL

- I developed a library automation system using Windows Forms and a relational database with MSSQL, which enables fast and efficient bookkeeping based on availability and allows tracking of all transactions.
- I learned the fundamentals of Object-Oriented Programming (OOP) and how to apply OOP principles using C# and Java.
- I also developed various HTTP backend APIs that enable frontend applications to communicate with databases.

Development Tools

GitHub, Jira, Visual Studio, Visual Studio Code, IntelliJ IDEA, SQL Server Management Studio

- I used the Git version control system to maintain versioning and keep the projects mentioned above up to date.
- Together with my project team, we followed Agile methodology and managed sprints through Jira to develop a CRM system website.

CERTIFICATES

- Beginner Level Frontend Web Development Certificate, Patika.dev
- Occupational Health and Safety Training Certificate
